2025

CALL FOR PAPERS

The 16th International Conference on Industrial Logistics (ICIL) 2025 will take place in Tokyo, Japan, from October 30th to November 2nd, 2025, hosted by the International Centre for Innovation and Industrial Logistics (ICIL).

ICIL is a non-profit professional association that has been developing an integrated view of Industrial Logistics, while sharing and exchanging ideas and research results among professionals, academics, students, and industrialists. The ICIL is the main means of attaining these objectives worldwide, with events held in France (1993), Brazil (1995), the USA (1997), Russia (1999), Japan (2001), Finland (2003), Uruguay (2005), Lithuania (2006), Israel (2008), Brazil (2010), Croatia (2012), Croatia (2014), Poland (2016), Israel (2018), and Croatia (2023). In 2025, Japan will host researchers once more.

Marking its 32nd anniversary, the conference will feature a multidisciplinary program that includes original research results and contributions to the fields of logistics and supply chain management. The Organizing and Scientific Committees gladly invite professionals, academics, students and industrialists to submit contributing papers to the conference.

We invite original research that examines the effect of Industry 5.0 on logistics and supply chain management. Papers are also welcome on topics such as advanced analytics, optimization, smart and connected logistics, circular economy models, and carbon-neutral operations. Additional relevant topics include ethical sourcing, waste reduction, and digital transformation. We particularly value contributions that demonstrate how novel approaches drive innovation in industrial logistics and supply chain management by connecting theory and practice.
